8. The module helped me to develop my abilities to think critically and independently by using “real life” infection prevention and control situations					
9. The module content allowed me to gain useful problem solving skills by using “real life” infection prevention and control situations					

## **Additional Comments/Suggestions**

**Keeping in mind that this is an orientation package and not meant to replace an accredited infection control course, do you now feel better prepared to begin your role as an ICP?**

**Do you have any suggestions on how we can improve this module ?**

**Are there any additional topics that should be included in the module?**

**Thank you for your feedback.**
