

Hand hygiene in residential care - How can we help you?

The **BC Hand Hygiene Communications Group** is a group of communications staff from each Health Authority who work together to promote hand hygiene in health care facilities. Most of our work to date has focused on acute care, so this year we want to help promote hand hygiene in Residential Care. **And we need your help!** We would like to support you by creating communications materials such as **posters, brochures, and online content** that meet your needs.

First, we need more information on what type of materials and messaging would be **most helpful to promote hand hygiene in your facility**. Please complete our online survey so that we can hear your ideas and opinions on what you think would work (or what wouldn't!) in your facility.

Share your ideas - complete our survey - enter to win prizes!

Each person that completes the survey can enter to win a prize draw for a Germ Bowling set, a Let's Go Viral! infection control training kit, or a PICNet prize pack. This survey is completely anonymous; if you want to enter the draw, you'll be taken to a separate entry form.

The prizes:

You can find the survey online at fluidsurveys.com/surveys/picnet/residential-care-hand-hygiene/

Too long to type? You can use this alternate link: <https://goo.gl/vnNkLL> (case-sensitive) or scan the QR code to the right with your mobile device.

Thanks in advanced for your time, and good luck in the prize draw!
The survey is open until midnight on June 30, 2017.
