What is Risk Assessment?

1. Notice the symptoms
   - Cough
   - Diarrhea
   - Vomiting
   - Rash

2. Do they also have a fever?

3. Are the symptoms new?

4. Is there something I should do?
   - e.g. Personal Protective Equipment

5. Is there something I should advise the patient to do?
   - e.g. respiratory etiquette, mask

6. Whom should I tell?
   - Physician or charge nurse

7. Have I seen more than one person with these symptoms today?

8. Could this be an outbreak?

Implement outbreak control strategies and contact Public Health.
